

CORR

Serial No. 07/957,080

transfer fluid, said lubricant comprising one or more compounds of general formula:

Set B1

II

wherein

R is the hydrocarbon radical remaining after removing the hydroxyl groups from pentaerythritol, dipentaerythritol, tripentaerythritol, trimethylol, ethane, trimethylol propane or neopentyl glycol, or the hydroxyl containing hydrocarbon radical remaining after removing a proportion of the hydroxyl groups from pentaerythritol, dipentaerythritol, tripentaerythritol, trimethylol ethane, trimethylol propane or neopentyl glycol;

each R^1 is, independently, H, a straight chain (linear) aliphatic hydrocarbyl group, a branched aliphatic hydrocarbyl group, or an aliphatic hydrocarbyl group (linear or branched) containing a carboxylic acid or carboxylic acid ester substituent, provided that at least one R^1 group is a linear aliphatic hydrocarbyl group or a branched aliphatic hydrocarbyl group; and

n is an integer.

Add the following claim:

-- 28. In a heat transfer method involving the use of a working fluid, the improvement which comprises using, as the working fluid, a composition as claimed in claim ¹⁹ X. --

REMARKS

Reconsideration is requested.

The claims now in the case are claims 1, 5, 8, 14, 15, 16, 17, 18, 20-22, 24, 27 and new claim 28, the last-mentioned claim representing a rewritten version of claim 26 to conform to U.S. practice.

Claim 1 has been amended to include features of cancelled dependent claims. See particularly cancelled claims 2-4, 6, 7 and 8 for (A) and claim 13 for (B).

The Examiner is respectfully requested to reconsider the Section 112 rejection of the claims. In rejecting the claims, the Examiner states that the claims are vague and indefinite in failing to recite relative proportions of the required components and that a person of ordinary skill in the art would be unable to determine the metes and bounds of the claimed invention. However, the applicant respectfully traverses the Examiner's position. Recitation of specific proportions is not necessary
